

Crema-Marfil-Marble-Polished

Crema Marfil Marble is one of the most known brands in modern natural stone tile flooring. In UK it is almost a trademark by itself, however so many cream and beige colour marble and limestones are called crema marfil or variations of this distinctive name to indicate the type and shade of the tile in comparison to the known warm cream color of original crema marfil. We directly import the very sought after original Crema Marfil Tiles from Spain and currently keep a stock of the popular polished finish with straight edges. It is applicable to all indoor projects for walling and flooring. Creamy and warm shades of the tile along with the glossy look of the polished marble makes it suitable for most interior designs. We will do a special welcome offer to celebrate the new introduction of this stone tile to our marble and limestone portfolio, until our stocks last. We highly recommend interested users to ask for a sample to compare with many different marble tiles which are sold under the same name. Please give us a call to discuss your stone tile flooring and walling projects. We can suggest the best stone tiles to fit to your bathroom, kitchen, hall, living room, conservatory, garden or patio for modern building decorations or period building renovations.
